

A woman with dark curly hair, wearing a yellow sari over a black and white polka-dot blouse, is looking into a wooden wardrobe. The wardrobe is filled with various clothes hanging on hangers. The scene is set in a room with wooden paneling.

Our project is E-Commerce Website for online shopping of clothes. This is a website which helps customers to find and buy all types of apparels on internet. It is useful in the way that it makes an easier way to buy and also provides the best price for the latter by tracking the price of the same product on various websites.

S-MART is an interactive e-commerce solution providing users with an opportunity to buy and sell garments. Electronic Commerce is process of doing business through computer networks. A person sitting on his chair in front of a computer can access all the facilities of the Internet to buy or sell the products.

Unlike traditional commerce that is carried out physically with effort of a person to go & get products, ecommerce has made it easier for human to reduce physical work and to save time. E-Commerce which was started in early 1990's has taken a great leap in the world of computers. Main advantage of e-commerce over traditional commerce is the user can browse online shops, compare prices and order merchandise sitting at home on their PC.

A platform for Smart Shopping
